<p>Hello. My name is _____ and I am working for the Center for Research, Evaluation Resources, and Development. We are conducting a local survey that asks women about various reproductive health issues. We would very much appreciate your participation in this survey. This information will help us inform the government to better plan health services in this and other areas of Kano, Nigeria. This survey will take about one hour to complete. The questions will cover family planning,</p>	

women empowerment and health service delivery. In addition, there are 20 questions about the types of information related to family planning you may be interested in getting on your own that will be used for public health research purposes. You do not have to respond to these questions as part of the PMA survey. You will be requested to participate in follow-up surveys. In order to identify you in the future, we would like to keep your name, geographic information, and phone number. However, we will not share this information with anyone outside of the study team and we will destroy it after the follow-up surveys. Participants in this survey are selected from various areas throughout Kano, Nigeria. Participation in this survey is entirely voluntary. If we should come to any question you don't want to answer, just let me know and I will go on to the next question; or you can stop the interview at any time. However, we hope that you will participate in this survey since your views are important. Whatever information you provide will be kept strictly confidential and your name, phone number, and geographic information will not be used when conducting analyses, presenting results, or sharing data. We will ask for consent from your parent or guardian for your participation in this study. If any questions make you uncomfortable and you would like to discuss this with a professional, our study staff will help you contact someone who will assist you in getting the help you want. At this time, do you want to ask me anything about the survey? There are no direct benefits to you as participants but data from all participants will be used collectively to inform the government of the family planning service delivery in the various areas in Kano, Nigeria. There are minimal or no perceived risks or harm for participating in this study. However, should you feel inconvenienced or uneasy to respond to some questions, please let me know so that I can skip such a question. Every woman 15-49 years that participates in this survey will receive a bar of soap in appreciation for their time. We will be happy to share the key results of the study with you in case you need to access them. If you have any questions related to this study you may contact Dr. Musa Sani Zakirai at Center for Research, Evaluation Resources and Development in Ile-ife, Nigeria at +XXX XXXXXXXXXX. I confirm that I have been read and understand the objectives of the research and have decided to take part in answering the questionnaire on the mobile smart phone. I understand that my name, phone number and geographic information will be kept so that I may be contacted in the future, but that it will not be shared with anyone outside of the team conducting this research. I understand that confidentiality will be maintained throughout the study, that my responses will not be shared with my parents, and that it will be impossible for anyone outside of the study team to link my responses to my identity. I understand that should I have any questions related to this study I may contact the principal investigators of the study, Dr. Musa Sani Zakirai at Center for Research, Evaluation Resources and Development in Ile-ife, Nigeria at +XXX XXXXXXXXXX.

Hello, my name is _____. I am one of the interviewers for the PMA/Lagos survey that is supported by the Center for Research, Evaluation Resources and Development. The survey will collect

information from selected households about household characteristics, reproductive behaviour among women of child bearing age and water and sanitation. Your household is one of those selected to participate in the survey.

Would it be alright for me to ask the girl/young woman who has been selected from this household some questions about education, reproductive health and birth history?

Topics that will be discussed include such things as age, education, marital status, birth history and contraception.

008a. May I begin the interview with her now?

Center for Research, Evaluation Resources and Development in Ile-ife, Nigeria at +XXX XXXXXXXXXXXX.

I confirm that I have been read and understand the objectives of the research, and have decided to take part in answering the questionnaire on the mobile smart phone. I understand that no identifying information about me will be recorded on the questionnaire or the report and that confidentiality will be maintained throughout the study, and that it will be impossible for anyone outside of the study team to link my responses to my identity. I understand that should I have any questions related to this study I may contact the principal investigators of the study, Dr. Musa Sani Zakirai at Center for Research, Evaluation Resources and Development in Ile-ife, Nigeria at +XXX XXXXXXXXXXXX. Do you have any questions? Do you wish to continue with the interview?

Thank you for agreeing to hear more about the survey. There are a few things you should know about this survey: 1. You get to decide if you want to be in the survey and whatever you decide is OK. 2. It is also OK to say 'Yes' and change your mind later. You can stop being in the survey at any time. If you want to stop, please tell me and I will not be upset. 3. You can say 'Yes' to the study and as I ask you questions, you can say 'No' to any question that you do not want to answer. 4. Your answers will be kept strictly confidential. That means that your answers will just be between you and me and will never be connected to your name or any other personal information. 5. Sometimes you might not know the answer to a question or might not want to answer a question. I would rather you say you don't know or that you don't want to answer a question than tell me a story that isn't true. 6. We will document your address so we can visit you at least one time a year for the 4 year duration of this study.

I wanted to give you some additional information on the type of questions I will ask you in this survey.

I want to tell you that some of the questions I will ask you are sensitive. I will ask you about your family, marital status and educational attainment. In addition, I will be asking about your sexual activity, pregnancy, fertility preferences and contraception. I know that these are sensitive and sometimes difficult things to talk about, but your answers will help us learn more about women in Nigeria.

The interview will take about 45 minutes to answer the questions.

There is little or no possibility that bad things will happen as a result of answering these questions. As I told you, some of the questions are sensitive and answering questions like this can be difficult, but you can choose not to answer questions that are difficult or end your participation at any time.

There are no direct benefits for being in the survey. This means that you will not get any money or gifts for being in this survey.

The interviewer has told me about the survey research. I had a chance to ask questions. I know that being in the survey is my choice. No one will be upset if I don't want to be in the survey or if I change my mind later. I know I can ask questions any time. I

<p>know that my answers will be kept confidential. I want to be in the survey.</p>	
<p>Thank you for agreeing to hear more about the survey.</p> <p>This research is being conducted by Drs. Scott Radloff and Phil Anglewicz of the Johns Hopkins University, and Dr. Funmilola OlaOlorun on behalf of the Center for Research Evaluation and Resource Development, Ile-Ife. This study is sponsored by the Bill & Melinda Gates Foundation through the Bill & Melinda Gates Institute for Population and Reproductive Health, Johns Hopkins University, Baltimore, MD.</p> <p>The purpose of this research is to learn more about your reproductive behavior, and how you and your household have been impacted by the coronavirus pandemic in order to provide government and other stakeholders with data to improve interventions and programs aimed at this population.</p> <p>We are asking you to join our study because you were interviewed by a member of our team in December 2019/January 2020 for a similar survey, and agreed to be contacted again. If you agree to participate in the study, we will ask you some of the same questions we asked before, as well as how this virus has impacted you. The questionnaire should take about 30 minutes to complete. After you complete the survey, you will be provided with a small gift.</p> <p>In total, we expect you to be involved in the original research for which we first contacted you for 3 years. Your participation in the study will only include annual or biannual surveys in-person or by phone.</p> <p>There are no major risks to participating in the study, but you may get tired or bored when completing the questionnaire. Some questions may be personal or sensitive and may make you feel embarrassed or uncomfortable. Please let us know if you feel distressed.</p> <p>There is a small risk that someone outside the study will see your information. We will do our best to keep your information safe by not including your name anywhere in the survey. Upon completion of the survey, data will be sent to and stored on a secure, password-protected server. Only authorized individuals will be able to access the data. All data are encrypted when transferred. When we share your information with other researchers, we will ask them to use the same protections.</p> <p>Your participation in this research will not cost you anything, apart from some of your time.</p> <p>There is no direct benefit to you from being in this study. We hope this knowledge will help us understand about reproductive health issues among women in Lagos, and how the coronavirus is affecting women's lives. The data collected from this study will provide information for future research, interventions, and programs.</p> <p>All information collected in this study will be given code numbers, and no names will be recorded. Your responses cannot be linked to you in any way, and your name or any identifier will not be used in any publications or reports from this study.</p>	

Your participation in this research is entirely voluntary. You do not have to join, it is your choice. There will be no penalty if you decide not to join.

If you choose not to participate, this will not affect your ability to participate in other surveys or receive services in your community.

You will be given a small token for your time. You will receive a small gift for participating in the study.

You can also choose to withdraw from the research at any time. Please note that any information that has been obtained from you before you choose to withdraw may have been used in data analysis or report writing. These cannot be removed, but the researchers will comply with your wish as much as it is practicable.

If you suffer any injury as a result of your participation in this research, the project will ensure you are referred to appropriate services.

What happens to research participants and communities when the research is over? The researchers will post the outcome of the research on the project website. During the course of this research, you will be informed about anything that may affect your continued participation, or your health.

If this research leads to commercial products, the Johns Hopkins University shall own it. There is no plan to contact any participant now or in the future about such commercial benefits.

We are not aware of anything that may prevent the researchers from conducting the research in a manner that will be fair.

Statement of person giving verbal consent: The description of the research has been read to me, or translated into language I understand. I have also talked it over with the interviewer to my satisfaction. I understand that my participation is voluntary. I know enough about the purpose, methods, risks and benefits of the research study to judge that I want to take part in it. I understand that I may freely stop being part of the study at any time. I am willing to participate.

This research has been approved by the Lagos State University Health Research Ethics Committee (LASUTH HERC) and the committee can be contacted at Health Research and Ethics Committee, Lagos State University Teaching Hospital, Lagos State. The phone number of the committee administrator is +XXX XXX XXX XXXX. In addition, if you have any question about your participation in this research, you can contact the local principal investigator, Dr. OlaOlorun, at her office in the Department of Community Medicine, College of Medicine, University of Ibadan. The phone is +XXX XXX XXX XXXX.

Thank you for agreeing to hear more about the survey. There are a few things you should know about this survey: 1. You get to decide if you want to be in the survey and whatever you decide is OK. 2. Section 4 – Sexual Activity

Check for the presence of others. Before continuing, make every effort to ensure privacy.

Now I would like to ask some questions about sexual activity in order to gain a better understanding of some important life issues. Let me assure you again that your answers are completely confidential and will not be told to anyone. If we should come to any question that you don't want to answer, just let me know and we will go to the next question.

401. How old were you when you first had sexual intercourse?	
Current age: \${age}	
Number of live births: \${birth_events}	
The respondent is pregnant	
Enter the age in years. <i>Enter -77 if she has never had sex. Enter -99 for no response. Enter -88 for do not know.</i>	

WARNING: you entered -77, but the respondent is currently pregnant or has given birth before. Go back and fix.
The timing of the number of births should agree with 401

<p>WARNING: the respondent gave birth $\{birth_events\}$ times, but first had sex at the age of $\{age_at_first_sex\}$, only $\{years_since_first_sex\}$ years ago. Is that correct? <i>The timing of the number of births should agree with 401.</i></p>	<p><input type="radio"/> Yes <input type="radio"/> No</p>
<p>You entered that the respondent was $\{p2_age_at_first_sex\}$ years old the first time she had sexual intercourse. Is that what she said? <i>Go back and change 401 if it is not correct.</i></p>	<p><input type="radio"/> Yes <input type="radio"/> No</p>
<p>You entered that the respondent's age at first sex was $\{p2_age_at_first_sex\}$. Previously the respondent said she has given birth at an earlier age: $\{age_first_birth\}$. Is that correct? <i>Go back and change "age at first sex" if it is not correct</i></p>	<p><input type="radio"/> Yes <input type="radio"/> No</p>
<p>402. Looking back to the first time you had sexual intercourse, do you think you would have preferred to: have waited longer before having sex with anyone, not have waited so long, or was it the right time?</p>	<p><input type="radio"/> Waited longer <input type="radio"/> Not have waited so long <input type="radio"/> It was the right time <input type="radio"/> No response</p>
<p>403. The first time you had sexual intercourse, would you say you and your partner were both equally willing to have sexual intercourse was one of you more willing than the other?</p>	<p><input type="radio"/> Equally willing <input type="radio"/> Respondent more willing <input type="radio"/> Partner more willing <input type="radio"/> No response</p>
<p>404. Which of these applied to you at the first time you had sex? <i>Read each option aloud and select if yes.</i></p>	<p><input type="checkbox"/> I was curious <input type="checkbox"/> I was carried away <input type="checkbox"/> I was under the influence of a substance <input type="checkbox"/> I was doing what was expected of me <input type="checkbox"/> I was forced against my will <input type="checkbox"/> None of the above <input type="checkbox"/> No response</p>
<p>405. Did you and your partner want to avoid a pregnancy the first time you had sexual intercourse?</p>	<p><input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> No response</p>
<p>406. Did you or your partner do something or use any method to delay or avoid getting pregnant?</p>	<p><input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> No response</p>
<p>407. When was the last time you had sexual intercourse?</p>	
<p>Respondent is $\{months_pregnant\}$ months pregnant.</p>	
<p>Answer must be in days or weeks up to 4 weeks or 30 days</p>	
<p><i>If less than 12 months ago, answer must be recorded in months, weeks, or days. Enter 0 days for today. You will enter a number for X on the next screen.</i></p>	<p><input type="radio"/> X days ago <input type="radio"/> X weeks ago <input type="radio"/> X months ago <input type="radio"/> X years ago <input type="radio"/> No response</p>
<p>407. Enter $\{last_time_sex_lab\}$.</p>	

<p><i>If today, enter zero days only, not zero weeks/months/years. Must agree with the age of first sexual intercourse and the pregnancy status.</i></p>	
<p>The respondent is pregnant. The time since last sex must not be earlier than one month prior to the start of pregnancy. If number of months pregnant is unknown, then the time since last sex must be less than 11 months. Months pregnant: \${months_pregnant} Last time sex units: \${last_time_sex} Last time sex value: \${last_time_sex_value}</p>	
<p>The respondent cannot enter a time since last sex that would be before her age at first sex. Age at first sex: \${age_at_first_sex} Current age: \${age} Last time sex units: \${last_time_sex} Last time sex value: \${last_time_sex_value}</p>
