<p>N</p> <p><i>consent</i></p> <p>Namaskar! My name is _____ and I am working for the IIHMR University Jaipur in collaboration with local Partners. I belong to this/nearby village. We are conducting a local survey that asks about your family and family members. Post to that we would also ask different questions from women aged between 15-49 years, which would help to identify gaps in family planning and health services that affect regular availability and quality of information, services, and products. This survey is conducted across Rajasthan. From every enumeration area 35 households have been selected and in this extension your house is randomly selected. Though we would very much appreciate your participation in the survey, your refusal to take part in this survey will have no repercussions on you. Information provided by you would help us inform the government to better plan health services. As such there is no risk however; there may be a distress among participants to share information on personal topics. If you agree to take part in this study, it will not benefit you directly. However, we believe that information gathered in this study will help us and other groups like us to develop programs that will improve the lives of men and women in communities in</p>	<p>note</p>

<p>Rajasthan and around India so we hope that you would take part in this survey. Whatever information you provide will be kept confidential and only our research team will have access to it. We will never use your name while analyzing the data. The tracking sheet and the database with your responses will be kept on password-protected computers and on a secure server. Participation in this study is entirely voluntary, if you do not wish to answer any question feel free to inform me and I would skip to the next question. You can choose not to participate at all or to end the interview at any point. The survey usually takes between 20 to 30 minutes to complete. If you have any questions about the study and your right as a research participant, you may ask me now or you may also contact Dr. Anoop Khanna at IIHMR University, in Jaipur, Rajasthan at +91-141-3924738.</p>
