<p>N consent Namaskar! My name is _____ and I am working for Indian Institute of Health Management and Research (IIHMR) to assist the government and communities in knowing more about health services. Now I will read a statement explaining the survey. Your facility is randomly selected to participate in this study along with many other health facilities in Rajasthan. We will be asking you questions about family planning and other reproductive health services and will ask to see patient registers. No patient names from the registers will be reviewed, recorded or shared. The information about your facility may be used by health organizations for planning service improvements or further studies of health services. The data collected from your facility will also be used by researchers for analysis. However, the name of your facility will not be provided, and any reports by researchers who use your facility data will only present information in compiled and aggregated form so that your facility cannot be identified. We are asking for your help to ensure that the information we collect is accurate. If there are questions for which someone else is the most appropriate person to provide the information, we would appreciate your introducing us to that person. You may refuse to answer any question or choose to stop the interview at any time and your refusal to participate will have no repercussions on you. If you have any questions about the study and your right as a research participant, you may ask me now or you may also contact Dr. Anoop Khanna at IIHMR University, in Jaipur, Rajasthan at +91-141-3924738.</p>							
<p>N begin_interview 009a. Provide a paper copy of the Consent Form to the respondent and explain it. Then, ask: May I begin the interview now?</p>	<p>Yes yes No no</p>
